

Reasons to open an Adult Social Care Workforce Data Set (ASC-WDS) account

✓ **benchmark your business performance**

Benchmark your workplace against others offering the same service in your local authority area. Access information about how your service is performing on workforce metrics such as staff turnover, care worker pay and staff sickness.

✓ **Record training and qualifications data**

Search, record and manage mandatory training by job role and get alerted to make updates and fill gaps in your training. Training reports also help you to evidence that you're fully up to date with your staff training during inspections.

✓ **Provide intelligence to decision makers**

Your workforce data could help your local authority, the DHSC and the Government plan for the future. The workforce is central to the adult social care sector. It determines the quality of care experienced, the success of care providers and the funding needed, so it's vital that we understand the workforce and the issues affecting it.

✓ **Access training and development funding**

You will need to be signed up with ASC-WDF to claim from the new Adult Social Care Training and Development Fund.

- ✓ **Store and access key workforce information** Create individual staff records that store personal details and other information, and access them all in one place.
